

WHEELS AND REAR AXLE PARTS

1/32 SCALE SLOT CAR WHEELS

These wheels are designed to fit 1/32 scale home set cars manufactured by Scalextric, Fly, Carrera or Ninco. You need to modify the axle by spinning the axle and placing a flat file or emery board to remove the knurls so the wheels slides on the axle.

On high performance cars like build by Slot-it and others that have set-screw wheels, these wheels will fit right on, will work best with cars with set-screw gears and tires, otherwise modification to the stock axle need to be made as mentioned above.

SS-16 – 0.434 Wide x 0.630 OD w 0.139 ridge wheel – fits Scalextric Lola/Cadillac or similar

SS-17 – 0.410 W x 0.590O.D. x 0.253 ridge, fits Fly classic, NINCO Rally, Spirit Lola, GB Track Porsche 917 and similar.

SS-18 - 0.310 x 0.490 O.D. x 0.178 ridge for Scalextric trans-am cars

FOAM RUBBER TIRES FOR SCALE CARS

These foam tires fit onto your 1/32 scale cars to run on wooden routed tracks, they fit on 3/32 axels or slick 7 hollow axles, on cars with knurled axles, you need to spin the axle and file down the knurls by spinning the axle against a flat file or emery board.

SS-30 -0.812 x 0.330 tires for trans-am cars and similar

SS-31 – 0.850Dia x 0.420W Tires for Sports cars and race cars

BEARINGS AND BUSHINGS

We offer ball bearings, and bushings to update the cheap bearings that come with stock 1/32 scale home set cars. Our bushings slip right in, but ball bearings may require epoxy to secure them

SS-02 – Axle bushing – 3/32 for Scalextric, Fly and Ninco cars

SS-03- 2mm Drive shaft bushing for FLY cars

SS-04- Rear end set – bushings & hollow axle

SS-22 – 3/32 precision ball bearing

SPACERS

We have an assortment of spacers for 1/32 scale cars for precision adjustment of rear axle. Tube spacer is handy for adjusting in-line gears

SS-12 – 0.005 thick stainless axle spacer

SS-13 – 0.010 thick polymer axle spacer

SS-14 – 0.100 thick tube axle spacers

STAINLESS STEEL HOLLOW AXLE

Slick 7 was the first to introduce hollow axles to 1/32 scale car racing, we even supplied them to high end car manufacturers!

SS-05 Precision ground 3/32 dia. Hollow axle

LEAD WIRE AND TUNING ITEMS

ULTRA FLEX LEAD WIRE

Not all lead wires are the same!
Slick 7 ultra flex lead wire is a high temperature silicone wire that is resistant to breaking from fatigue and is coated with a nonstick coating to prevent snagging in the car.

A great update to your race car.

SS-23 – Ultra flex Silicone lead wire 22AWG

TUNING LEAD

Slick 7 Lead features an oil resistant adhesive; the lead can be cut to size, and it will stick to your chassis for the entire race.

Loose pieces of lead around the track are a thing of the past!

SS-08 - Slick Lead

LED HEADLIGHTS

Slick 7 LED lights add bright white headlights for your car, includes the current limit resistor. Just connect across the leads to your motor to power them.

SS-09 - White LED headlights kit

TWEAKER MAGNETS

If your racing rules allow, these tweaker magnets can be used to balance the handling of your car on a track with magnetic braid or rails.

SS-10 Neodymium tweaker magnet –
0.400 x 0.200 x 0.100 thick

SS-11 Neodymium tweaker magnet –
0.400 x 0.200 x 0.050 thick

RACING LUBRICANTS

GLIDEX

High speed synthetic lubricant with ultra-high film strength for the lowest friction possible, Glidex is low viscosity for ball bearings, Glidex II is medium viscosity for bushings.

VOODOO

Voodoo – The shortest path to speed! One drop of Voodoo on your commutator and you get an instant boost in top speed. Voodoo cleans the commutator and polishes the arc pits away. A must for qualifying or Drag racing runs. Voodoo also works on braid, to clean braid during the race.

Another use for VOODOO is to clean and soften hard rubber tires to increase traction of club racing 1/32 true scale cars on wooden or plastic tracks. Voodoo is a must for every racer!

Glidex ----- S7-405
Glidex - 4oz.---- S7-538

Glidex II ----- S7-426
Glidex II - 4oz - S7-539

Voodoo ----- S7-404
Voodoo - 4oz - S7-537

NEEDLE POINT OILER BOTTLE

Empty bottle, treated so oil will not seep out. The bottle we use for Voodoo and Glidex

S7-406 - Needle Point Oiler Empty Bottle

OILER REPLACEMENT CAP

Replacement cap for our voodoo and glydex bottles! If you lose your cap, no problem, the replacement will fit perfectly, like new!

S7-531 – Needle Point Oiler replacement cap
